CAREER OBJECTIVE

Full-Stack Software Developer-((MERN- Next.js*React *Node.js * MongoDB * Express.js))

WORK EXPERIENCE

Web-developer • Internship   Jun 2025 - Aug 2025
Chingu, Virtual

1.
   - Collaborated in a 2 month of remote Agile/Scrum team (Chingu Voyage 56). Built the core structure using Next.js, React, MongoDB, and contributed to features like an AI chatbot, Surgery Page, and Admin Dashboard. Strengthened teamwork, communication, and real-world project delivery skills.

PROJECTS

Twitter Clone(frontend) ↗
Sep 2025

A front-end only, Twitter-inspired application built with React.js and styled using Tailwind CSS, replicating the look and feel of Twitter's core interface

Ai Chatbot ↗
Sep 2025

AI Chatbot – Built an interactive chatbot application using React, Tailwind CSS, and Google Gemini API. Designed a clean chat interface with responsive UI, real-time conversation handling, and smooth user experience. Integrated Gemini API for generating intelligent, human-like responses.

V56-tier2-team-21 ↗
Jun 2025 - Aug 2025

Modern Surgery Center Web Application – Developed a full-stack app for staff to manage patient info and display real-time surgery progress to families, using React 19, TypeScript, Vite, TailwindCSS, and Shadcn/UI

Buy me chai ↗
Jun 2025

Buy Me a Chai – Built a donation platform with Next.js, React, TailwindCss, MongoDB, and Mongoose, integrating Razorpay for secure payments and Toastify for instant user feedback.

linktree-app ↗
May 2025

Linktree Clone – Developed a full-stack bio link platform with Next.js, Node.js,React, NextAuth (GitHub login), and MongoDB, enabling users to create personalized link profiles with secure authentication.

shortner-url ↗
May 2025

Full-stack app using Next.js, Node.js, React, MongoDB, Javascript,TailwindCss . Users can shorten URLs and redirect seamlessly. Focused on backend API design and database integration.

iTask-Manager ↗
Apr 2025

iTask Manager – Developed a full-stack task management application using React, Tailwind CSS, Node.js, and Express.js. Implemented core features including add, edit, delete, task completion toggle, copy-to-clipboard, and toast notifications.
